The Cascadia Permaculture Institute

invites you to join some of the Pacific Northwest's leading permaculturists for this comprehensive **Permaculture Design Certification** course. ~ Gain a clearer understanding of theory, design, and practice of ecological design through lecture, discussion, slide shows, design projects, and hands-on experience.

Permaculture is a whole-systems method of design that offers ways to create permanent culture by conscious, sustainable use of resources in all aspects of living.

Course Topics Include:

- Permaculture Ethics & Principles
- Mapping and Design Exercises
- Natural Cycles and Pattern Recognition
- Observation & Site Analysis
- Reading the Land
- Garden Design & Establishment
- Useful Plants and Planting Strategies
- Water Harvesting, Management, & Conservation
- Soil Building and Ecology
- Animals in the System
- Forests, Agroforestry, & Tree Crops
- Eco-Building & Appropriate Technologies
- Urban Permaculture & Village Design
- Cooperative Economics
